Android recyclerview adapter filter example. How to populate recyclerview android. Android recyclerview filter example.

CheckedTextView is an extension of normal TextView that has a checkbox along with some text. It is mainly used in a ListView where we want to show which item is selected or not. Checkmark attribute is used to provide a graphic or a drawable to CheckedTextView. Download GITHUB code from Here. Creating New Project 1. In Android Studio, go to File => New Project and fill all the details required to create a new project. When it prompts to select a default activity, select Blank Activity and proceed. 2. Open build.gradle and add recyclerview dependency. com.android.support:recyclerview-v7:26.1.0 and rebuild the project. Build.gradle dependencies { // RecyclerView implementation 'com.android.support:recyclerview-v7:26.1.0' } 3. In activity_main.xml I have added one RecyclerView with the following basic properties. activity_main.xml Writing the Adapter Class After adding the RecyclerView widget, let's start writing the adapter class to render the data. 4. Create an layout xml named row_item.xml with the below code. This layout file shows a single row in recycler view . row_item.xml
